Notes:			Target	Sights	Any – as per gun type		
			Rounds	GRSB 60, GRCF - 36			
			Max. Score	GRSB 300, GRCF - 180			
			Ready Pos.	Benched			
			Position	Benched			
			Penalties	No event specific penalties			
				Range Commands			
				<ul style="list-style-type: none"> • “SHOOTERS TO THE LINE”.... “UNBAG AND SHOW CLEAR” – ROs check each firearm is clear. • CRO reads out the Course of Fire and checks understanding. • “CHECK AND ADJUST” – shooters may check their firearms and adjust their sights onto the target • Having checked that the range is clear and shooters appear ready, the CRO commands “LOAD AND MAKE READY”. Having given time to load and make ready, the CRO commands “ARE YOU READY?” Silence will be taken as agreement – any competitor who is not ready may raise one arm or call “NOT READY”, after which the CRO will confirm “NOT READY CALLED” and repeat until silence. • “STAND BY” Targets remain static for 5 seconds and then start to advance, signalling that shooting may begin. • When the targets turn away, firing must cease immediately. CRO will command “UNLOAD AND SHOW CLEAR”. After each firearm is cleared, it must be placed on the bench. • When all ROs have reported clear, the CRO will command “RANGE IS SAFE” and give permission to ROs to go forward in order to reset, score and replace targets as necessary. Competitors must not go forward of the firing point, but may start picking up their cases after this command is given. • “STOP, STOP, STOP” – On hearing this command all competitors must cease shooting immediately and keep the gun pointing in a safe direction, keep their finger away from the trigger and wait for further instructions (note that anyone on the range can, and should, call “STOP, STOP, STOP” if they become aware of any potential safety issue. 			
<p>B6.9.1: Competitors fire from a seated position using a bench / table. The fore-end stock of the rifle is supported either by a bipod (attached to the rifle) or by a rest (not attached to the rifle). A rest may be positioned anywhere along the fore-end of the rifle but must not support more than 100mm (4”) of the length of the fore-end. The butt of the rifle must be in the firer’s shoulder and not supported in any way by the table / bench or by any other device. The non-firing hand may not be touching the rifle or the bipod / rest when the trigger is pulled. The elbow of the firing arm may rest on the bench / table.</p> <p>This event involves range equipment with a significant number of moving parts and requires climbing over range equipment to reface targets. Make sure that access is kept clear and that shooter equipment is placed behind, rather than between, the firing points. Extra care must be taken.</p> <p>Be alert to range equipment failures and notify any issues to Range Maintenance Team at the earliest opportunity. Reshoots can be offered in the event of Range Equipment failure.</p> <p>NB targets should be mounted with the bottom edge close to the bottom edge of the frame to accommodate the much lower benched firing position.</p>
